Dryer
User Manual

TGU490RX0

TABLE OF CONTENTS

Please read this user manual first!

Dear Customer,

Thank you for prefering a Blomberg product. We hope that your product which has been manufactured with high quality and technology will give you the best results. We advise you to read through this manual and the other accompanying documentation carefully before using your product and keep it for future reference. If you transfer the product to someone else, give its manual as well. Pay attention to all details and warnings specified in the user manual and follow the instructions given therein.

Use this user manual for the model indicated on the cover page.

Explanation of symbols

Throughout this user manual the following symbols are used:

(i)	Important information or useful hints about usage.
⚠	Warning for hazardous situations with regard to life and property.
⚡	Warning against electric shock.
♨	Warning against hot surfaces.
🔥	Warning against fire hazard.
♻	Packaging materials of the product are manufactured from recyclable materials in accordance with our National Environment Regulations.

Do not dispose of the packaging wastes with the domestic waste or other wastes, discard them to the dedicated collection points designated by the local authorities.

1 Important instructions for safety and environment

This section contains safety instructions that will help protect from risk of personal injury or property damage. Failure to follow these instructions shall void any warranty.

1.1 General safety

- The dryer can be used by children at and above 8 years old and by persons whose physical, sensory or mental capabilities were not fully developed or who lack experience and knowledge provided that they are supervised or trained on the safe usage of the product and the risks it brings out. Children should not play with the product. Cleaning and maintenance works should not be performed by children unless they are supervised by someone.
- Children of less than 3 years should be kept away unless continously supervised.
- Adjustable feet should not be removed. The gap between the dryer and the floor should not be reduced with materials such as carpet, wood and tape. This will cause problems with the dryer.
- Always have the installation and repairing procedures carried out by the **Authorized Service.** Manufacturer shall not be held liable for damages that may arise from procedures carried out by unauthorized persons.
- Never wash the dryer by spraying or pouring water onto it! There is the risk of electric shock!

Important instructions for safety and environment

1.1.1 Electrical safety

⚠ Electrical safety instructions should be followed while electrical connection is made during the installation.

- Connect the dryer to a grounded outlet protected by a fuse at the value specified on the type label. Have the grounding installation performed by a qualified electrician. Our company shall not be liable for any damages that will arise when the dryer is used without grounding in accordance with the local regulations.
- The voltage and allowed fuse protection is stated on the type label plate.
- The voltage specified on the type label must be equal to your mains voltage.
- Unplug the dryer when it is not in use.
- Unplug the dryer from the mains during installation, maintenance, cleaning and repair works.
- Do not touch the plug with wet hands! Never unplug by pulling on the cable, always pull out by grabbing the plug.
- Do not use extension cords, multi-plugs or adaptors to connect the dryer to power supply in order to decrease the risk of fire and electric shock.
- Power cable plug must be easily accessible after installation.

⚡ Damaged mains cable should be changed notifying the Authorized Service.

⚡ If the dryer is faulty, it must not be operated unless it is repaired by an authorized service agent! There is the risk of electric shock!

Important instructions for safety and environment

1.1.2 Product safety

Points to be taken into consideration for fire hazard:

Below specified laundry or items must not be dried in the dryer considering fire hazard.

- Unwashed laundry items
- Items soiled with oil, acetone, alcohol, fuel oil, kerosene, stain removers, turpentine, paraffin or paraffin removers must be washed in hot water with plenty of detergent before being dried in the dryer.

For this reason especially the items containing the above specified stains must be washed very well, to do this use adequate detergent and choose a high washing temperature.

Below specified laundry or items must not be dried in the dryer due to the fire hazard:

- Garments or pillows bolstered with rubber foam (latex foam), shower bonnets, water resistant textiles, materials with rubber reinforcement and rubber foam pads.
- Clothing cleaned with industrial chemicals.

Items such as lighter, match, coins, metal parts, needle etc. may damage the drum set or may lead to functional problems. Therefore check all the laundry that you will load into your dryer.

Never stop your dryer before the programme completes. If you must do this, remove all laundry quickly and lay them out to dissipate the heat.

Clothes that are washed inadequately may ignite on their own and even may ignite after drying ends.

Important instructions for safety and environment

• You must provide enough ventilation in order to prevent gases exiting from devices operating with other types of fuels including the naked flame from accumulating in the room due to the back fire effect.

⚠	Underwear that contains metal reinforcements should not be dried in the dryer. Dryer may be damaged if metal reinforcements come loose and break off during drying.
ⓘ	Use softeners and similar products in accordance with the instructions of their manufacturers.
ⓘ	Always clean the lint filter before or after each loading. Never operate the dryer without the lint filter installed.

• Never attempt to repair the dryer by yourself. Do not perform any repair or replacement procedures on the product even if you know or have the ability to perform the required procedure unless it is clearly suggested in the operating instructions or the published service manual. Otherwise, you will be putting your life and others' lives in danger.

• There must not be a lockable, sliding or hinged door that may block the opening of the loading door in the place where your dryer is to be installed.

• Install your dryer at places suitable for home use. (Bathroom, closed balcony, garage etc.)

• Make sure that pets do not enter the dryer. Check the inside of the dryer before operating it.

• Do not lean on the loading door of your dryer when it is open, otherwise it may fall over.

• The lint must not be allowed to accumulate around the tumble dryer

Important instructions for safety and environment

1.2 Mounting over a washing machine

- A fixing device should be used between the two machines when installing the dryer above a washing machine. The fitting device must be installed by the authorized service agent.

- Total weight of the washing machine and the dryer -with full load- when they are placed on top of each other reaches to approx. 180 kilograms. Place the products on a solid floor that has sufficient load carrying capacity!

⚠	Washing machine cannot be placed on the dryer. Pay attention to the above warnings during the installation on your washing machine.

Installation Table for Washing Machine and Dryer							
Dryer Depth	**Washing Machine Depth**						
	62 cm	**60 cm**	**54 cm**	**50 cm**	**49 cm**	**45 cm**	**40 cm**
54 cm	Can be installed					Can be installed	Cannot be installed
60 cm	Can be installed					Cannot be installed	

Important instructions for safety and environment

1.3 Intended use

- Dryer has been designed for domestic use. It is not suitable for commercial use and it must not be used out of its intended use.
- Use the dryer only for drying laundry that are marked accordingly.
- The manufacturer waives any responsibility arisen from incorrect usage or transportation.
- The service life of the dryer that you purchased is 10 years. During this period, original spare parts will be available to operate the dryer properly.

1.4 Child safety

- Packaging materials are dangerous for the children. Keep packaging materials away from children.
- Electrical products are dangerous for the children. Keep children away from the product when it is operating. Do not let them tamper with the dryer. Use the child-proof lock in order to prevent the children to tamper with the dryer.

> **ⓘ** Child-proof lock is on the control panel.
> **(See Child lock)**

- Keep loading door closed even when the dryer is not in use.

Important instructions for safety and environment

1.5 Compliance with the WEEE regulation and disposing of the waste product

This product complies with EU WEEE Directive (2012/19/EU). This product bears a classification symbol for waste electrical and electronic equipment (WEEE). This product has been manufactured with high quality parts and materials which can be reused and are suitable for recycling. Do not dispose of the waste product with normal domestic and other wastes at the end of its service life. Take it to the collection center for the recycling of electrical and electronic equipment. Please consult your local authorities to learn about these collection centers.

1.6 Compliance with RoHS Directive:

The product you have purchased complies with EU RoHS Directive (2011/65/EU). It does not contain harmful and prohibited materials specified in the Directive.

1.7 Package information

Packaging materials of the product are manufactured from recyclable materials in accordance with our National Environment Regulations. Do not dispose of the packaging materials together with the domestic or other wastes. Take them to the packaging material collection

points designated by the local authorities.

1.8 Technical Specifications

5. Drying basket user manual*

*It can be supplied with your machine depending on its model.

3 Installation

Before the calling the nearest Authorized Service for the installation of the dryer, ensure that electrical installation and water drain is appropriate referring to the user's manual. **(See 3.3 Connecting to the drain and 3.5 Electrical connection)** If they are not suitable, contact a qualified electrician and technician to make necessary arrangements.

ⓘ	Preparation of the dryer's location as well as the electrical and waste water installations is under customer's responsibility.

⚠	Prior to installation, visually check if the dryer has any defects on it. If the drier is damaged, do not have it installed. Damaged products cause risks for your safety.

3.1 Appropriate installation location

Install the dryer on a stable and level surface. Dryer is heavy. Do not move it by yourself.
- Operate your dryer in a well ventilated, dust-free environment.
- The gap between the dryer and the surface should not be reduced by the materials such as carpet, wood and tape.
- Do not cover the ventilation grills of the dryer.
- There must not be a lockable, sliding or hinged door that may block the opening of the loading door in the place where your dryer is to be installed.
- Once the dryer is installed, it should stay at the same place where its connections have been made. When installing the dryer, make sure that its rear wall does not touch anywhere (tap, socket, etc.).
- Place the dryer at least 1 cm away from the edges of other furniture.
- Your dryer can be operated at temperatures between +5°C and +35°C. If the operating conditions fall outside of this range, operation of the dryer will be adversely affected and it can get damaged.
- The rear surface of the tumble dryer shall be placed against a wall.

⚡	Do not place the dryer on the power cable.

## 3.2 Removing the transportation safety assembly

⚠	Remove the transportation safety assembly before using the dryer for the first time.

Open the loading door.
There is a nylon bag inside the drum that contains a piece of styrofoam. Hold it from its section marked with **XX XX.**
Pull the nylon towards yourself and remove the transportation safety assembly.

| ⚠	Check that no part of the transportation safety assembly remains inside the drum.

3.3 Connecting to the drain

In products equipped with condenser unit, water accumulates in the water tank during the drying cycle. You should drain accumulated water after each drying cycle. You can directly drain accumulated water through the water drain hose supplied with the product instead of periodically draining the water collected in the water tank. Please refer to the detailed instructions supplied with the accessories pack.

Installation

Connecting the water drain hose

1-2 Pull hose at the behind of the dryer by hand in order to disconnect it from where it is connected. Do not use any tools to remove the hose.

3 Connect one end of the drain hose supplied with the dryer to the connection point from where you removed the hose of the product in previous step.

4 Connect the other end of the drain hose directly to the wastewater drain or to the washbasin.

⚠	Hose connection should be made in a safe manner. Your drain house will be flooded if the hose comes out of its housing during water discharge.
ⓘ	Water drain hose should be attached to a height of maximum 100 cm.
ⓘ	Make sure that the water drain hose is not stepped on and it is not folded between the drain and the machine.

3.4 Adjusting the feet

In order to ensure that the dryer operates more silently and vibration-free, it must stand level and balanced on its feet. Balance the machine by adjusti
ng the feet.
Turn the feet to left or right until the dryer stands level and firmly.

ⓘ	Never unscrew the adjustable feet from their housings.

3.5 Electrical connection
For specific instructions for electrical connection required during installation **(See 1.1.1 Electrical Safety)**

3.6 Transportation of the dryer
Unplug the dryer before transporting it.
Drain all water that has remained in the dryer.
If direct water drain connection is made, then remove the hose connections.
⚠	We recommend carrying the dryer in upright position. If it is not possible to carry the machine in the upright position, we recommend carrying it by tilting towards the right side when looked from the front.

3.7 Changing the illumination lamp
In case an illumination lamp is used in your laundry dryer.To change the Bulb/LED used for illumination of your tumble dryer, call your Authorized Service.
The lamp(s) used in this appliance is not suitable for household room illumination. The intended purpose of this lamp is to assist the user to place laundry in the tumble dryer in a comfortable way. The lamps used in this appliance have to withstand extreme physical conditions such as vibrations and temperatures above 50 °C.

4.1 Laundry suitable for drying in the dryer

Always obey the instructions given on the garment tags. Dry only the laundry having a label stating that they are suitable for drying in a dryer and make sure that you select the appropriate programme.

LAUNDRY DRYING SYMBOLS							
	Drying Symbols	Suitable for dryer	No Iron	Sensitive / Delicate dry	Do not dry with dryer	Do not dry	Do not dry-clean
	Drying Settings	At any temperature / At high temperature	At medium temperature / At low temperature	Without heating	Hang to dry	Lay to dry / Hang wet to dry / Lay in shadow to dry	Dry-cleanable

IRON	Iron -					
	Dry or Steam	Iron at high temperature	Iron at medium temperature	Iron at low temperature	Do not iron	Iron without steam
	Maximum temperature	200 ºC	150 ºC	110 ºC		

4.2 Laundry not suitable for drying in the dryer

(i) Delicate embroidered fabrics, woolen, silk garments, delicate and valuable fabrics, airtight items and tulle curtains are not suitable for machine drying.

4.3 Preparing laundry for drying

- Laundry may be tangled with each other after washing. Separate the laundry items before placing them into the dryer.
- Dry garments having metal accessories such as zippers, inside out.
- Fasten the zippers, hooks and buckles and button sheets.

4.4 Things to be done for energy saving

Following information will help you use the dryer in an ecological and energy-efficient manner.

- Spin your laundry at the highest speed possible when washing them. Thus, the drying time is shortened and energy consumption is reduced.
- Sort out the laundry depending on their type and thickness. Dry the same type of laundry together. For example thin kitchen towels and table clothes dries earlier than thick bathroom towels.
- Follow the instructions in the user manual for programme selection.
- Do not open the loading door of the machine during drying unless necessary. If you must certainly open the loading door, do not to keep it open for a long time.
- Do not add wet laundry while the dryer is in operation

Preparation

- Clean the lint filter before or after each drying cycle. **(See 6.1 Cleaning Lint Filter / Loading Door Inner Surface)**
- Clean the condenser regularly at least once every month or after every 30 drying cycles. **(See 6.4 Cleaning the condenser;)**
- Ventilate the room, where the dryer is located, well during drying.

4.5 Correct load capacity

Follow the instructions in the "Programme selection and consumption table". Do not load more than the capacity values stated in the table.
ⓘ	It is not recommended to load the dryer with laundry exceeding the level indicated in the figure. Drying performance will degrade when the machine is overloaded. Furthermore, dryer and the laundry can get damaged.

Following weights are given as examples:

| Laundry	Approximate weights (g)*
Cotton quit covers (double)	1500
Cotton quit covers (single)	1000
Bed sheets (double)	500
Bed sheets (single)	350
Large tablecloths	700
Small tablecloths	250
Tea napkins	100
Bath towels	700
Hand towels	350
Blouses	150
Cotton shirts	300
Shirts	250
Cotton dresses	500
Dresses	350
Jeans	700
Handkerchiefs (10 pieces)	100
T-Shirts	125

*Dry laundry weight before washing.

Dryer / User Manual

Operating the product

5.3 Preparing the dryer

Plug in the tumble dryer
Open device door.
Place the laundry into the tub in a slight loosely.
Close the door by pushing.
 Make sure there is nothing door and the device while closing the door.

Press and hold **On/Off/Cancel** button for 1 second.

- When dryer is used for the first time, declaration program (cupboard dry cottons) is selected.

 Program doesn't start immediately only by pressing the **On/Off/Cancel** button. Start the program with the **On/Off/Cancel** button after program selection.

5.4 Programme selection

Your dryer has 16 different programs.

- Select the desired program by turning the program selection button..
- Displayed program selection and consumption chart are based on sorting by preferences of majority of users.

Operating the product

5.5 Programme selection and consumption chart

Programs	Program Description	Capacity (kg)	Spin Speed in Washing Machine (rpm)	Drying Time (min)
Cottons Extra Dry	You may dry your thick cotton laundry in this program such as towels, bathrobe, etc. You can put your laundry in the wardrobe without ironing.	9	1000	159
Cottons Cupboard Dry	You may dry all your cotton laundry in this program. (T-shirt, pants, pyjamas, baby clothes, underwear, linen, etc.) You can put your laundry in the wardrobe without ironing.	9	1000	149
Cottons Iron Dry	You may dry your cotton laundry to be ironed in this program to have them slightly damp for ease of ironing. (Shirt, T-shirt, tablecloth, etc.)	9	1000	118
Synthetics Cupboard Dry	You may dry all your synthetic laundry in this program. (Shirt, T-shirt, underwear, tablecloth, etc.) You can put your laundry in the wardrobe without ironing.	4.5	800	58
Synthetics Iron Dry	You may dry your synthetic laundry to be ironed in this program to have them slightly damp for ease of ironing. (Shirt, T-shirt, tablecloth, etc.)	4.5	800	45
Jeans	You may dry denim pants, skirts, shirts or jackets in this program.	4	1200	85
Sports	Use for drying laundry made out of synthetic, cotton or mixed type of fabrics.	4	1000	92
Daily	This programme is used to dry cottons and synthetics daily, and lasts for 59 minutes.	4	1000	59
Xpress	You can use this program to dry cotton laundry that you had wringed in high rpm in your washing machine. It dries 1 kg of your Cotton laundry (3 shirts / 3 T-shirts) in 40 minutes.	2	1200	40
Shirts 15'	Dries shirts more delicately and thus causes less wrinkles for easy ironing.	0.5	1200	15
Mix	Use this programme to dry non-pigmenting synthetic and cotton laundry items together.	4	1000	83
BabyProtect	This programme is used for baby clothes that bear machine dryable approval on its label.	3	1000	80
Delicates	You may dry your delicate laundry or laundry with hand wash symbol (silk blouses, thin underwear, etc.) at low temperature in this program.	2	600	50

Operating the product

Wool Refresh	Use this programme to ventilate and soften the woollen laundry that can be washed in the washing machine. Do not use to dry the laundry completely. Take out and ventilate the laundry immediately after the programme is over.	1.5	600	6
Freshen Up	Ventilates for 10 minutes without blowing hot air. You can ventilate the cotton and linen clothes that have been enclosed for a long time with this program to remove their odour.	-	-	10
Timer Programmes	You can select the timer programs from 10 mins to 160 mins to achieve the desired final drying level under low temperature. In this program, the dryer dries for the time set, regardless of the dryness of the laundry.	-	-	-

* Weight of dry laundry before washing

i	When the program ends for not having wrinkles on your delicate laundry, take out your laundry immediately and hang them.

Energy consumption values				
Programs	Capacity (kg)	Spin speed in washing machine (rpm)	Approximate amount of remaining humidity	Energy consumption value kWh
Cottons linen Ready to wear**	9	1000	% 60	5,05
Cottons Ready to iron	9	1000	% 60	4,10
Synthetics Ready to wear	4,5	800	% 40	1,90

i	To get better results from drying machine programs, your laundry should be washed with suitable program in your washing machine and wrung with recommended wringing speed.
i	Shirt might remain slightly damp at the end of the program. It is recommended not to leave the shirts inside the drying machine.

** : Energy Label standard program (EN 61121:2012)
All the values on the chart are identified according to EN 61121:2012 standard. Consumption values may vary from the valued in the chart depending on laundry type, wringing speed, ambient conditions and voltage levels.

| **i**	When selecting the Cottons programme, send the condensed water out through the drain hose.

# Operating the product

5.6 Auxiliary functions
Audible warning
◁))) Machine makes an audible warning when the program is completed. To adjust the sound level, use the Sound Warning Level button.

> ⓘ You can change the sound level before the program starts or while the program continues..

Drying level extra

# Operating the product

5.7 Warning symbols

 Warning symbols may vary depending on the model of your machine.

Fibre filter cleaning
When the program is completed, the warning symbol for filter cleaning turns on.

 For detailed information, See 6 Maintenance and cleaning.

 If filter cleaning symbol constantly flashes See.7 Troubleshooting.

Emptying the water tank
When the program is completed, the warning symbol to empty the water tank turns on.

 For detailed information, See 6 Maintenance and cleaning.

If the water tank fills up while the program continues, the warning symbol starts flashing and the machine goes into stand-by. In this case, empty the water tank and start the program by pressing the Start / Stand-by button. Warning symbol turns off and program resumes.

Cleaning the condenser
Warning symbol flashes with certain intervals to remind that the condenser needs to be cleaned.

 For detailed information, See 6 Maintenance and cleaning.

Loading cover is open
If loading cover of the dryer is open while drying, Stand-by symbol turns on and program progress symbol flashes.

End time
You can delay the end time of the program up to 24 hours with end time function.

- Open the loading door and place the laundry.
- Select drying program, spin cycle and if needed, additional functions.
- Press the End Time selection button and set the delay time you wish. End Time symbol turns on. (When pressed and hold the button, End Time proceeds non-stop).
- Press the Start / Stand-by button. End time countdown starts and Start symbol turns on. ":" Separator in the middle of displayed delay time flashes.

 You can add or remove laundry within end time. End Time symbol will turn off at the end of countdown, drying starts and duration of program is displayed. Displayed time is the sum of normal drying time and end time.

Operating the product

Changing the end time

If you want to change the duration during the countdown:

- Press the **On/Off/Cancel** button for 3 seconds to cancel the program. Turn on the machine again and repeat the Delay Setting process for the duration you wish.
- When your machine is turned on for the first time, it turns on with the declaration program (cotton wardrobe dry).

Cancelling the end time function

If you want to cancel the end time countdown and start the program immediately:

- Press the **On/Off/Cancel** button for 3 seconds to cancel the program.
- Press the **On/Off/Cancel** button to start you previously selected program.

5.8 Starting the programme

Press the ▶ Start/Stand-by button to start the program.

Indicating start of the program, Start symbol turns on, ":" separator in the middle of remaining time keeps flashing. Program Progress Symbol turns on.

5.9 Programme progress status

5.10 Child Lock

The machine has a child lock which prevents the program flow from being interrupted when the buttons are pressed during a

program. To activate the child lock

- Press and hold time programs and audio warning buttons for 3 seconds.
- When the child lock is activated, the lock symbol on the screen turns on.

- When the child lock is activated, all buttons on the panel except the On/Off/Cancel and Child Lock buttons are deactivated.
- When the child lock is activated, indicator symbols don't change if the position of Program Selection button is changed. When Program Selection button is turned and function buttons are pressed, the letters "CL" flashes on the screen.

- The child lock has to be deactivated to be able to start a new program after the current program is finished or to be able to interfere with the program.

To Deactivate The Child Lock:

- Press and hold the child lock button for 3 seconds.
- Child lock deactivates when the dryer is turned off and on by the **On/Off/Cancel** button.

Operating the product

5.11 Changing the programme after it is started

You can change the program you selected to dry your laundry with a different program after the machine starts running.

- For example, to select Extra Dry instead of Iron Dry, pause the program by pressing the Start / Stand-by button.
- Select the Extra Dry program using the Program Selection button.
- Press the Start/Stand-by button to start the program.

Adding and removing clothes during stand-by

- If you want to add or remove clothes to/from the machine after the drying program starts:
- Press the Start/Stand-by button to put the machine in Stand-by state. The drying operation stops.
- Open the loading door while in Stand-by state, and close the door after you remove or add laundry.
- Press the Start/Stand-by button to start the program.

🛈	Adding laundry after the drying operation starts may cause the dried laundry inside the machine to mix with wet laundry and leave the laundry damp at the end of operation.
🛈	Adding or removing laundry during drying may be repeated as many times as you wish. But this operation continuously interrupts the drying operation, and thus increases program duration and energy consumption. So, it is recommended to add laundry before the program starts.
🛈	If a new program is selected by turning the program selection knob while the machine is in stand-by; the running program terminates and new program information is displayed on the screen.

⚠️	**WARNING:** Do not touch the inner surface of the drum while adding or removing clothes during a continuing program. The drum surface is hot.

5.12 Cancelling the programme

If you want to cancel the program and terminate the drying operation for any reason after the machine starts running, keep the **On/Off/Cancel** button pressed for 3 seconds.

⚠️	**WARNING:** The inside of the machine shall be extremely hot when you cancel the program during machine operation, so run the ventilation program to allow it to cool down.

5.13 End of programme

When the program ends, the Fibre Filter Cleaning and Water Tank warning symbols on the program observation indicator turn on. Loading door may be opened and machine becomes ready for another run.
To turn off the machine, press the **On/Off/Cancel** button.
🛈	Wrinkle Prevention function activates the 2 hour-Wrinkle Prevention program if laundry isn't taken out of machine after completion of the program.
🛈	Clean the fibre filter after each drying. See **6.1 Cleaning Lint Filter / Loading Door Inner Surface**
🛈	Empty the water tank after each drying. See **6.3 Draining the water tank**

Service life of product extends and frequently experienced problems will be reduced if it is cleaned at regular intervals.

6.1 Cleaning Lint Filter / Loading Door Inner Surface

Lint and fiber released from the laundry to the air during the drying cycle are collected in the Lint Filter.

|	
(i)	Such fiber and lint are generally formed during wearing and washing.
⚠	Always clean the lint filter and the inner surfaces of the loading door after each drying process.
(i)	You can clean the lint filter housing with a vacuum cleaner.

To clean the lint filter:
- Open the loading door.
- Remove the lint filter by pulling it up and open the lint filter.
- Clean lint, fiber, and cotton raveling by hand or with a soft piece of cloth.
- Close the lint filter and place it back into its housing.
- A layer can build up on the filter pores that can cause clogging of the filter after using the dryer for a while. Wash the lint filter with warm water to remove the layer that builds up on the lint filter surface. Dry the lint filter completely before reinstalling it.
- Clean the entire inner surface of the loading door and loading door gasket with a soft damp cloth.
Maintenance and cleaning

6.2 Cleaning the sensor

There are dampness sensors in the dryer that detect whether the laundry is dry or not.
To clean the sensors:

- Open the loading doorof the dryer.
- Allow the machine to cool down if it is still hot due to the drying process.
- Wipe the metal surfaces of the sensor with a soft cloth, dampened with vinegar and dry them.

ⓘ	Clean metal surfaces of the sensors 4 times a year.
ⓘ	Do not use metal tools when cleaning metal surfaces of the sensors.
⚠	Never use solvents, cleaning agents or similar substances for cleaning due to the risk of fire and explosion!

6.3 Draining the water tank

Dampness of the laundry is removed and condensed during drying process and the water that arise accumulates in the water tank. Drain the water tank after each drying cycle.

|	
⚠	Condensed water is not drinkable!
⚠	Never remove the water tank when the program is running!

If you forget to drain the water tank, the machine will stop during the subsequent drying cycles when the water tank is full and the Water Tank warning symbol will flash.
If this is the case, drain the water tank and press **Start / Pause** button to resume the drying cycle.

To drain the water tank:

- Pull the drawer and remove the water tank carefully.
- Drain the water in the tank.
- If there is lint accumulation in the funnel of the water tank, clean it under running water.
- Place the water tank into its seat.

Maintenance and cleaning

If the direct water draining is used as an option, there is no need to empty the water tank.
6.4 Cleaning the condenser;

Hot and humid air in the condenser is cooled with the cold air from the room. Thus, the humid air circulating in your dryer is condensed and then pumped into the tank.
Clean the condenser after every 30 drying cycles or once a month.
To clean the condenser:
1. If a drying process has been carried out, open the door of the machine and wait until it cools down.

2. Unlock the 2 condenser locks after opening the kick plate.

3. Pull out the condenser.

4. Clean the condenser by applying pressurized water with a shower armature and wait until the water drains.

5. Place the condenser in its housing. Fasten the 2 locks and make sure that they are seated securely.

6. Close the kick plate cover.

8 Troubleshooting

Drying process takes too much time.

- Pores of the lint filter are clogged. >>> Wash the lint filter with warm water.
- Condenser may be clogged. >>> Clean the Condenser.
- Ventilation grids on the front side of the machine are blocked. >>> Remove the objects (if any) that block ventilation in front of the ventilation grids.
- Ventilation may not be sufficient since the room where the machine is installed is very small. >>> Open the door and window of the room to avoid the room temperature increase too much.
- Lime deposit has built up on the dampness sensor. >>> Clean the dampness sensor.
- Excessive laundry might have been loaded in. >>> Do not load the dryer in excess.
- Laundry might not be spun sufficiently. >>> Spin your laundry at a higher speed in your washing machine.

Laundry comes out wet at the end of drying.

> ⓘ After drying, the hot clothes feel damper than their actual dampness level.

- A programme suitable for the laundry type might have not been used.>>> Check the garment tag and select a programme suitable for the fabric type or use the timer programmes additionally.
- Pores of the lint filter are clogged. >>> Wash the lint filter with warm water.
- Condenser may be clogged. >>> Clean the Condenser.
- Excessive laundry might have been loaded in. >>> Do not load the dryer in excess.
- Laundry might not be spun sufficiently. >>> Spin your laundry at a higher speed in your washing machine.

Dryer does not switch on or the programme does not start. Dryer does not start when it is set.

- It might have not been plugged in. >>> Make sure that the machine is plugged in.
- The loading door is ajar. >>> Make sure that the loading door is closed securely.
- Programme is not selected or the Start / Pause button is not pressed. >>> Make sure that the programme is selected and the machine is not in Pause mode.
- "Childproof lock" might have been activated. >>> Deactivate the Childproof Lock.

Programme is interrupted without any cause.

- The loading door might not be closed securely. >>> Make sure that the loading door is closed securely.
- A power failure might have occurred. >>> Press Start / Pause button to start the program.
- Water tank may be full. >>> Drain the water tank.

Troubleshooting

Laundry has shrunk, become felted or deteriorated.
• A programme suitable for the laundry type might have not been used. >>> Check the garment tag and select a programme suitable for the fabric type.

Drum lighting does not turn on. (On models with lamp)
• Dryer might not be switched on with the On / Off / Cancel button. >>> Make sure that the dryer is switched on. • Bulb may have blown. >>> Call Authorized Service Agent to have the lamp replaced.
